Preliminary Findings			
This report relates to a match following searching against the National DNA Database. The crime scene DNA profile [INSERT BARCODE] obtained from [INSERT EXHIBIT NUMBER AND DESCRIPTION] relating to [INSERT SCENE ADDRESS] has generated a match to the DNA profile held on the National DNA Database under the name of [INSERT NAME] [INSERT DATE OF BIRTH] [INSERT BARCODE]. PLEASE NOTE: In this case, the crime scene DNA profile is partial (i.e. incomplete). This often occurs when the crime scene sample is deficient in either quantity or quality of DNA and, as a result, it is only possible to carry out a comparison with [INSERT NAME]'s DNA profile, at those corresponding areas of the DNA profile that have produced a result. The crime scene DNA profile that has been loaded to the National DNA Database contains insufficient information to be able to assess the statistical significance of the match at this stage. If required, a direct comparison can be carried out between the crime scene and subject DNA profile, by the Forensic Service Provider. This will provide more information about the evidential significance of this match.			
Evidence Type Supporting / Technical Information			
Technical information, including issues that may affect the interpretation of DNA evidence is available from FSPs, CPS, Knowledge Hub and the National DNA Database documentation websites.			
Status of Compliance with the Code of Practice published by the Statutory Forensic Science Regulator			
Where the MG22A is being used to provide initial/interim forensic outcomes, to support an enquiry, interview or strategy, it does not require a declaration of compliance or non-compliance with the FSR Code. However, a declaration can be included where it may assist the intended recipient (e.g. investigator, commissioning party). (Insert appropriate declaration – Refer to FSR Guidance: Declarations of Compliance and Non-Compliance with the Code of Practice FSR-GUI-0001) DELETE CELL IF NOT REQUIRED			
To the Investigator			
The forensic information contained in this report is based on the information provided at the time and initial findings and / or assessment of a crime scene and exhibit(s). It is provided to the police investigator to support a line of enquiry and / or establish if there is evidential value in proceeding with the forensic information. Should further forensic analysis or comparison be required in this case, the investigator must contact the relevant Force Forensic Department with their requirements in accordance with standard force operating procedures.
